%%<=====
```

Quick description of contents:

```
README.test      : the file you are reading.

fxench.tst       : this file has to be converted to 8-bit and renamed french.tst;
                  this is the bi-lingual torture test basic file used to
                  typeset the following documents:

frenchlb.tex     : a french LaTeX book (to be compared at printing level
                  with frenchrf.dvi),

frenT1lb.tex     : the same, but with T1 font encoding forced.
babel1b.tex      : the same, but french loaded by Babel
babelplb.tex     : the same, but with frenchpro option of Babel
frenchab.tex     : the same with AmsLaTeX.
frenchlm.tex     : the same, loading the french style after \documentstyle.
frenchln.tex     : the same, loading the french style before \documentstyle.
                  and testing the "poor man french style" option.
frenchlr.tex     : a french LaTeX report
frenchla.tex     : a french LaTeX article
frenchll.tex     : a french LaTeX letter (just a test)
frencht.tex      : a french TeX document
nofrench.tex     : to test that french.dmy is running ok
```

```
myfigure.ps      : an EPS face (not mine)
mygglo.ist       : the file is use with Makeindex to produce my glossary
mylist.sty       : a verbatim style
mypsfig.tex      : a version of psfig
mysmall.sty      : only given for fun and any help...
frenchlb.ind     : for those who don't have makeindex, this is the index produced.
frenchlb.gls     : for those who don't have makeindex, this is the glossary too.
```

frenchrf.dvi : the Torture test (french1b) document composed by the author.
(The program makeindex was used to produce the index
i.e. the .ind file and the glossary i.e. the .gls file)

kbto.tex : a sample binary test file to adapt to your own keyboard.

=====

- 1- (I hope you have already generated kb7to8 and kb8to7)
Convert the file french.tst to 8-bit.
Adapt kbto.tex to your keyboard and apply kb7to8 and kb8to7 on it. Check the outputs.
- 2- Ensure your TEXINPUT path pointing to the inputs directory first.
For LaTeX users: LaTeX frenchlb.tex
For TeX users: TeX frencht.tex
- 3- Print the first 45 pages of frenchlb.dvi.
- 4- Print the first 45 pages of frenchrf.dvi and then compare the outputs
- 5- Go back to the main directory.
