CAUTION : ALL FILES HAVE CHANGED since the last distribution.
```

This material was designed to help (La)TeX users to print French documents i.e. according to French typographic habits. Here are the source files for producing the documentation.

The French Pro distribution, as provided by his author is composed of other directories. The "doc" directory hosts the following files :

Quick description of contents:

```
README_doc.pdf: this file.
DROIT.pdf      : article on Internet legal matters
artET98.pdf    : article published for EuroTeX'98 in St Malo, France.
fenglish_doc.pdf: the documented file of fenglish.sty
frdoc.tex      : the basic French documentation source file used to compose:
french_doc.pdf: the code of French Pro with its comments and the Copyright
frenchlu.tex   : the LaTeX users manual and installation manual for
                  the French Pro package (source file).
frguide.tex    : just the user's guide (source file).
frguide.pdf    : printable French Pro users's guide.
frenchle.pdf   : printable frenchle users's guide
mymaj.sty      : a style to print change bars (used in previous files)
myfroptn.sty   : a sample of personal style file with French Pro options
```

other *.pdf files are source files provided in a pdf printable format.

Your optional "TO DO" list: (the documentation is already provided in the
===== master directory: ALIRE.pdf)

- 1- (I hope you have already generated kb7to8 and kb8to7)
Convert the file frdoc.tex and frenchlu.tex to 8-bit.
- 2- Then the commands: [frpdf]latex frenchlu
makeindex -s fridx1.list frenchlu

```
[frpdf]latex frenchlu
```

would normally provide a readable complete French documentation, i mean a [.pdf/.dvi file that could be previewed or printed via the appropriate driver. This should normally provide the same viewed file as ALIRE.pdf in the root directory.

- 3- Move frguide.pdf adn frldoc.pdf to the documentation directory where you want the user find it.

Hope you enjoy it,

Bernard GAULLE
